YooVee CRS1E for Aquaculture

The YooVee CRS 1E has been incorporated for many years into Aquaculture systems both large and small. The unique chamber design promotes mixing and increased irradiation that reduces pathogen shading.

The Perth Zoo has been using YooVee to reduce water borne pathogens and assist with the micro flocculation of algae for many years. YooVee has been instrumental in their Native Species Breeding Program.

Challenger TAFE in Perth incorporated YooVee to sanitise water in their successful rotifer breeding program. Recently YooVee was installed in their Yellow Tail Kingfish RAS.

Features & Benefits – YooVee CRS1E

- ◆ Affordable, effective, easy to install & service.
- ◆ Destroys 99.9% of pathogens. NATA certified.
- ◆ YooVee has a unique chamber that;
 - a. Creates Increased Irradiation by turbulating water around the UV light.
 - b. The hydrodynamic forces promote mixing and reduce shading.
 - c. Water quality & lamp function can be viewed safely.
- ◆ Made in Australia from quality components.
