

YOOVEE CRS1E
20,000 litres/hour

Seadragonz Swim School is one of WA's most awarded swim schools with many Swim Australia and Environmental Awards to their credit.

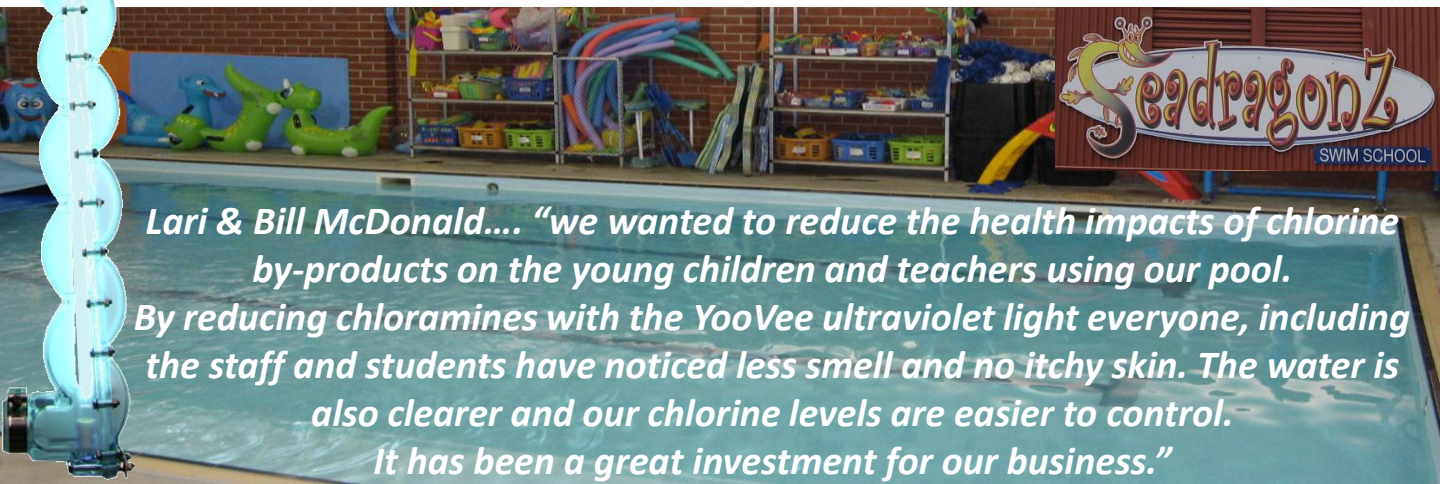

They have recently installed a **YooVee CRS** (Chemical Reduction System) to treat their 100,000 litre indoor heated pool. The system is highly effective at destroying Chloramines, Pathogens and improving the Health & Comfort of the swim teachers and bathers alike.

Cost effective, this high quality system is made locally by Algaefree Australia and is easy to operate and maintain.

100,000 Litre Indoor Heated Pool

Features & Benefits – YooVee CRS1E (10,000 litres/hour)

- ◆ Highly effective, easy to install & service with low maintenance costs.
- ◆ Destroys Chloramines & Inactivates 99.9% of pathogens. NATA certified.
- ◆ YooVee has a unique chamber that;
 - a. Creates Increased Irradiation by turbulating water around the UV light.
 - b. The hydrodynamic forces promote mixing and reduce shading.
 - c. Water quality & lamp function can be viewed safely.
- ◆ Made in Australia from quality components.

Lari & Bill McDonald... "we wanted to reduce the health impacts of chlorine by-products on the young children and teachers using our pool. By reducing chloramines with the YooVee ultraviolet light everyone, including the staff and students have noticed less smell and no itchy skin. The water is also clearer and our chlorine levels are easier to control. It has been a great investment for our business."
